SUMMARY

Software engineer with experience building scalable web applications, backend services, developer tooling, and performance-focused user interfaces using JavaScript/TypeScript ecosystems. Worked across frontend architecture, API development, testing, deployment, and system optimization in both startup and product environments. Comfortable contributing across domains by learning systems quickly, solving ambiguous engineering problems, and shipping maintainable production software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux Toolkit, React Query, HTML5, CSS3, SCSS, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL

Databases: MongoDB, PostgreSQL

Testing: Jest, Vitest, Playwright, React Testing Library

DevOps & Tools: Docker, AWS, GitHub Actions, Webpack, Vite, Datadog, Git

Concepts: System Design Fundamentals, API Design, Authentication (JWT/OAuth2), State Management, Performance Optimization, CI/CD, Responsive Design

EXPERIENCE

Reax Technology Platform Pvt Ltd

Software Engineer | Remote

Feb 2024 – Mar 2026

- Built and maintained scalable product features using React, TypeScript, Node.js, and REST APIs for a SaaS platform serving 30K+ users.
- Designed reusable component systems shared across multiple applications, improving development consistency and reducing duplicated implementation effort.
- Improved frontend performance by reducing page load time by 35% through route-level code splitting, deferred initialization, and bundle optimization strategies.
- Worked closely with product and design teams to translate complex workflows into maintainable production systems.
- Contributed to architecture discussions, debugging production issues, and improving engineering reliability through testing and code reviews.
- Maintained high test coverage using Jest, Vitest, and Playwright for critical application flows.

Wayverb

Founder & Software Engineer | Remote

Apr 2023 – Jan 2024

wayverb.com

- Built and launched a full-stack school management platform from scratch using React, React Native, Node.js, Express.js, and MongoDB.
- Designed backend APIs, database structures, authentication flows, and frontend architecture independently.
- Implemented role-based workflows for administrators, teachers, and parents with secure access control.
- Managed deployment, feature iteration, debugging, and production maintenance across the platform lifecycle.
- Collaborated directly with users to identify operational pain points and convert them into technical solutions.

Mindnerves Technologies

Software Engineer Intern | Remote

Jul 2022 – Mar 2023

- Developed React-based interfaces for a real-time job tracking platform with thousands of active users.
- Optimized rendering performance and state handling for data-intensive workflows.
- Reduced redundant API requests by implementing cache-first data fetching strategies using React Query.
- Contributed to feature delivery, bug fixes, and internal engineering improvements within an agile team environment.

PROJECTS

Echo — AI Voice-to-Intelligence Desktop Application

Electron.js • JavaScript • OpenAI APIs

github.com/iammayank18/echo

- Built a desktop application that converts speech into structured AI-generated outputs in real time.
- Implemented transcription workflows, provider switching, secure local key handling, and streaming UI updates.
- Designed extensible architecture supporting multiple AI providers.

mimi.js — Open Source API Framework

Node.js • JavaScript

github.com/iammayank18/mimi

- Developed an open-source Node.js library for building web APIs with built-in request parsing and Swagger documentation support.
- Focused on simplifying backend setup and improving developer experience.

ADDITIONAL

- Active problem solving practice on LeetCode.
- Strong interest in scalable systems, backend engineering, and distributed applications.
- Open to frontend, backend, and full-stack software engineering roles.

EDUCATION

Arya College of Engineering and Research Center

2019 - 2023

Bachelor of Technology, Computer Science | GPA: 8.0/10 | Jaipur, Rajasthan
